**Revista Română de Inginerie Civilă  
Volumul 9 (2018), Numărul 3**

Some thoughts what brings end of this century to building sector, to life stile, inside and outside living conditions

*Branislav Todorović*

Economic and energy efficiency of investments in digitalized systems

*Gabriela Mehedintu, Nicolae Postavaru*

Clădire cu consum redus de energie termică. Surse regenerabile – recuperare de căldură și pompă termică

Low-energy building. Renewable Sources - Heat Recovery and Heat Pump

*Florin Iordache, Eugen Mandric*

Dezvoltare durabilă sau sustenabilitate

Sustainable development or sustainability

*Adrian Retezan, Ioan Silviu Doboși, Remus Retezan*

Aplicarea procedurilor de determinare a scalelor energetice și prezentarea unui model pentru certificatul de performanță energetică

Applying the procedures for determining the energy scales and submitting a model for the energy performance certificate

*Cătălin Lungu, Silviana Brata*

Evoluția normelor specifice de consum a gazelor natural pentru necesitățile casnice în condițiile Republicii Moldova în ultimii 50 de ani

The development of specific rate of gas consumption for household requirements in the conditions of the Republic of Moldova in the last 50 years

*Mariana Haiducova, Constantin Țuleanu*

Energy system for tomorrow - role of exergy

*Peter Novak*

Sistem de cogenerare-trigenerare. Analiza energetica pe un scenariu de alimentare a unui consumator

Cogeneration-trigeneration system. Energy analysis on a consumer scenario

*Florin Iordache*

From irreversibility to sustainability linking energy storage, geo-ecology recovery and renewables

*Marija S. Todorović*

Surse reci autocompensate sezonier in sisteme de instalatii echipate cu pompe de caldura reversibile

Seasonally self-compensated cold sources in installation systems equipped with reversible heat pumps

*Andreea Baran, Ionela Cazacu, Theodor Mateescu, Razvan Luciu*

Analiza randamentelor unui sistem de cogenerare cu motoare termice cu combustie internă ca sursă primară și cazan de apă caldă ca sursă de vârf

Efficiency analysis of a CHP plant, based on reciprocating engines as prime movers and a hot water boiler as peak source

*Gabriel Mărcuș, Vlad Iordache, Rodica Frunzulică, Florin Iordache*

Application des indicateurs PMV, PPD de confort thermique et du critère de confort thermique local pour l'évaluation des paramètres du microclimat dans la chambre à condition que les parois sont endommagées

Application of PMV, thermal comfort PPD and local thermal comfort criteria for the evaluation of microclimate parameters in the chamber, provided that the walls are damaged

*Viktor Petrenko, Kostiantyn Dikarev, Oleksandra Kuzmenko, Anatolii Petrenko, Ivan Ogdansky*

Prof/trac project – improving skills for successfully designing, constructing, renovating and operating nearly zero energy buildings

*Andrei Vladimir Lițiu, Tiziana Buso, Anita Derjanecz, Carmen Luminița Cuc, Ioan Silviu Doboși, Adrian Retezan*

Evaluation de déplacement maximal d'un noeud constructif à condition de robustesse et ayant un volume imprécis

Maximum displacement evaluation of a node constructive, provided that it is robust and has a volume imprecise

*Baranenko Valeriy, Volchok Denys*
